## Assembly Guide

Use an exacto knife to cut the bits connecting the parts to the frame.

Remove the parts from the frame with a rotating motion along the axis formed by the bits you just cut.

Use the exacto knife to remove any of the remaining connection bits.

Use **wood glue** for assembly. Always dry fit the parts first to make sure the components are correct ones. If you encounter any issues, please contact us at [info@laserox.net](mailto:info@laserox.net) or our Facebook page at [facebook.com/laseroxinserts](https://facebook.com/laseroxinserts).

Always dry-fit the parts together without any glue to make sure you are assembling the correct parts.

Use a drop of glue along the joints and hold it in place until the glue has sufficiently dried.

Press the parts together or use a hobby hammer with slight force for assembly.

**WARNING** Choking hazard!  
Not for children under 14 years.
