

## Before you start

If this is your first Laserox organizer please make sure to watch our beginners guide video, (see next page) where we have collected some **Tips & Tricks** about the building process. If you are a hardcore organizer veteran you should watch it too, just to be on the safe side.

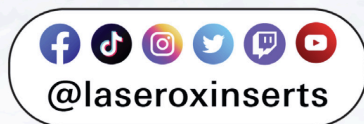

We have also recorded a complete, **step by step video** on how to assemble this organizer, so if you prefer to follow an instructional video, just scan the QR code and get started.

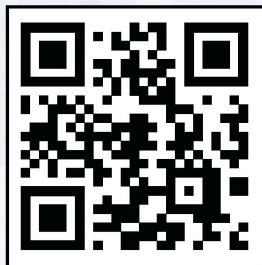

There is also a curated **Spotify playlist** Laserox and Cephalofair put together with our favorite songs that you can listen to while you build. Again, just scan the code and start listening.

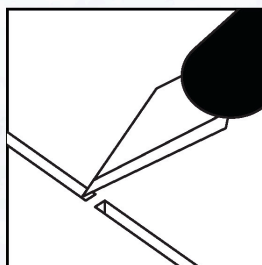

If you encounter any issues during assembly, please reach out to us on one of **our official channels** or head to our **discord server** where our community members are always ready to give you a helping hand.

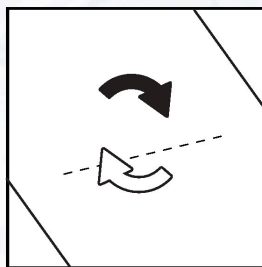

**Enjoy and Stay organized!**

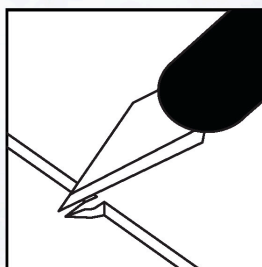

Watch our  
Tips&Trick  
video on how  
to build our  
organizers.  
Just scan the  
qr code.

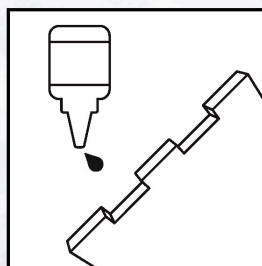

Use an exacto  
knife to  
cut the bits  
connecting  
the parts to  
the frame.

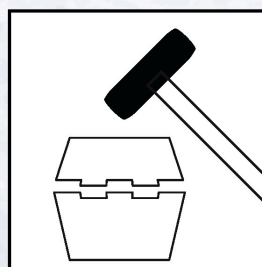

Remove the  
parts from the  
frame with  
a rotating  
motion along  
the axis formed  
by the bits you  
just cut.

Use the  
exacto knife  
to remove  
any of the  
remaining  
connection  
bits.

Most joints  
are press-fit,  
but some  
joints might  
require a  
drop of glue  
to ensure a  
strong bond.

Press  
the parts  
together or  
use a hobby  
hammer with  
slight force  
for assembly.

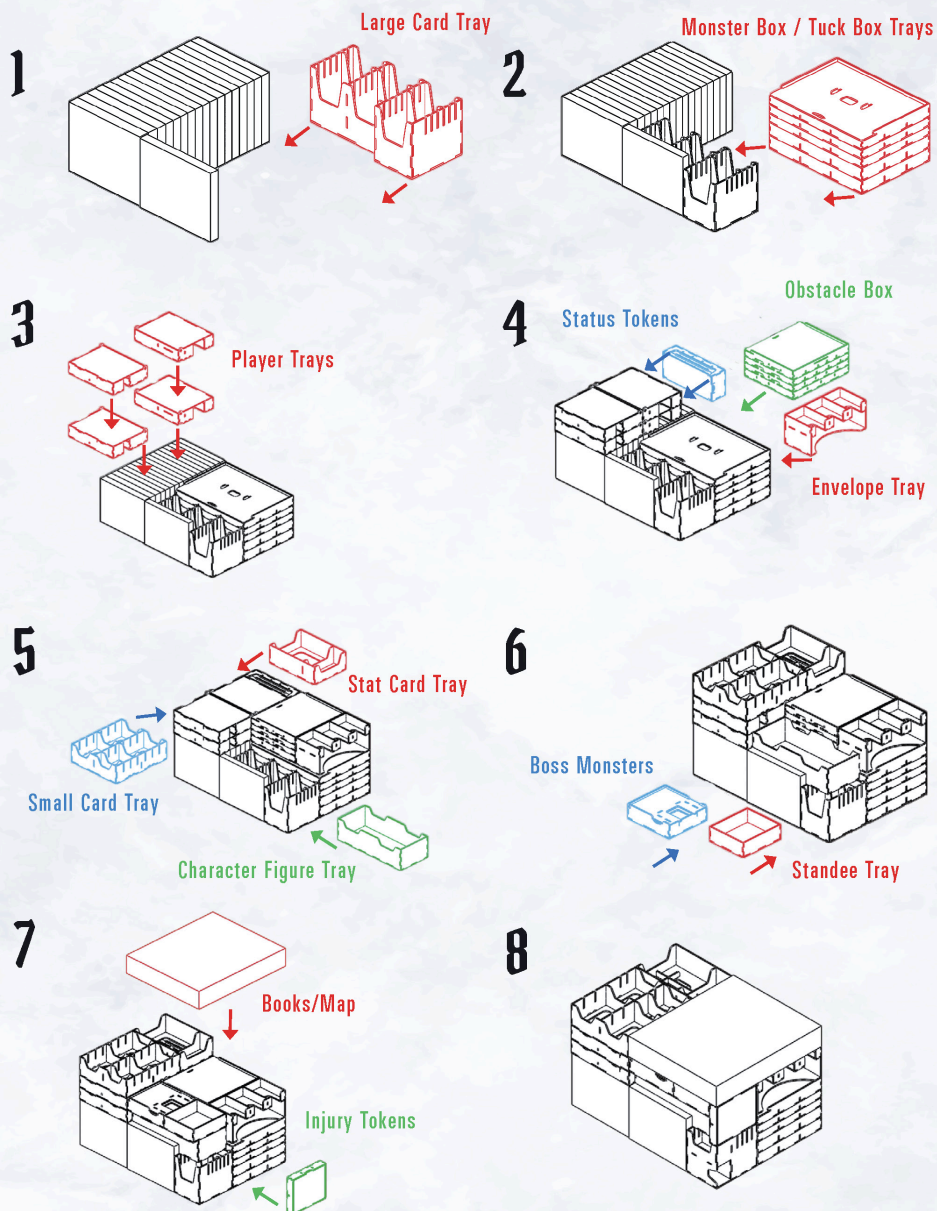

Use the **wood glue** provided for assembly.
