Time Warp

Compatible with Anachrony[®]

Assembly Guide

 **WARNING:**
CHOKING HAZARD
Not for children under 3 years.

This box organizer is compatible with Anachrony™
This product is not licensed, and is up for change at any time in the future.

Use an exacto knife to cut the bits connecting the parts to the frame.

Remove the parts from the frame with a rotating motion along the axis formed by the bits you just cut.

Use the exacto knife to remove any of the remaining connection bits.

Always dry-fit the parts together without any glue to make sure you are assembling the correct parts.

Use a drop of glue along the joints and hold it in place until the glue has sufficiently dried.

Use **wood glue** for assembly. Always dry fit the parts first to make sure the components are correct ones. If you encounter **any** issues, please contact us at info@laserox.net or our Facebook page at facebook.com/laseroxinserts

Big Cards

1. Insert the middle piece first into the sides and then the rest.
2. The lid does NOT need to be glued!

Buildings

Small Cards

The lid does NOT need to be glued!

Water & Resource Cubes

Watch for the correct parts, as they are different for the top and bottom. The two boxes are NOT meant to be glued together.

Path tokens

Insert the two "A" pieces first. Only glue them to part "B". Then put these together with part "C" into the bottom. You can glue "B" & "C" to the bottom, but do NOT glue "A". Finally insert the front/back and the two sides. The top should slide freely.

This box holds the path tokens (triangles, round tokens and the suit hexagons). The cut out is for the 5th faction hexagon tokens.

Faction cards

Energy Core, Victory Points

1. Glue the round tourn pieces with the flat part on TOP to the lid! Then slide the lid into the sides, dividers and glue the bottom. Do NOT glue the round parts with the side elements!

Research tokens

The lid should not be glued on, it fits tight into the side parts.

Paradox tokens, etc

Superprojects

Find the part "D", which has the same height as part "E" in the middle.

Timeline

One side has a cut-out, the other is without cutout. It does not matter which way you assemble it.

Workers

Mini Trays

Watch that these parts align together at the ends!

1. Break out the "Z" pieces from the grid and use 4 for each minifigure box.
2. The bottom part "F" has always hexagon cuts, which secure the minifigures from sideway movement.
3. The top part differs for the 5 boxes! See the chart next page, to align the correct "G" parts with the correct box lids (with path engravements)
4. Align the correctly, that the ends are together!
5. Assemble the sides or the bottom first. Whichever you feel more comfortable with.
6. Glue the top, with the correct path symbol onto the top.
7. The sides should NOT be glued!

The middle parts "G" are designed to lock the minis from above, so even if you turn the box upside down, they stay in palce. So these parts are always bigger (wider) than part "F".

How to fit everything into the box

Step 1

Step 2

Step 3

Place the thinner extension boards (doomday, chronobot) onto the path cards
Also the scoring sheet goes on here

The player boards and then on top the rulebooks go onto the boxes, where you have a big space left.

Look for the Anachrony symbol engraving on the boxes, which guides you how to arrange everything into the box after playing
